

EuCertPlast Scheme Audit

UL's auditors help recyclers implement good industry practices and verify output quality

At UL we help companies increase their understanding of the EuCertPlast Scheme and assess their recycling facility against the most recent requirements.

EuCertPlast Project

EuCertPlast is a project for establishing European certification for post-consumer plastics recyclers. The EuCertPlast organization has defined requirements based on the European Standard EN 15343:2007 and aims to encourage recycling of plastics by using environmentally friendly practices, particularly focusing on the process for traceability and assessment of conformity and recycled content. Recyclers interested in becoming certified by EuCertPlast must be audited by an Accredited EuCertPlast Auditor.

UL completes over 500,000 inspection audits annually and has been testing and assisting customers in producing safe plastics for over 70 years. This means we leverage our knowledge

base, staff expertise, relationships with public authorities and regulators to ensure our approach continuously meet and exceeds regulators expectations.

The UL Choice

UL's EuCertPlast accredited auditors utilize the best available practices to assess your facility to the EuCertPlast requirements. We provide audits for:

1. Initial certifications
2. Annual monitoring
3. Change to recycling process

Depending on the type of audit, UL will work with you to review the applicable audit sections within the EuCertPlast Scheme, such as

- Required Permits
- Management Team
- Incoming Materials Procedures and Controls
- Stock management
- Production Processes
- Recycled Output Control
- Environmental Protection
- Subcontracting
- Quality management

After the audit, UL provides a comprehensive audit report along with any findings so they can be addressed. If the facility is found to meet EuCertPlast requirements, UL will issue a EuCertPlast Certificate of Compliance letter that is valid for the duration of one year per the EuCertPlast guidelines.

Our integrated portfolio of solutions for recyclers can also help plan, build and manage opportunities up and down your supply chain. Speak to a UL representative today and see how you can achieve more visibility and control of your business operations.

Why Choose UL?

UL is a premier global independent safety science company that has championed progress for 120 years. Its more than 10,000 professionals are guided by the UL mission to promote safe working and living environments for all people. UL uses research and standards to continually advance and meet ever-evolving safety needs. We partner with businesses, manufacturers, trade associations and international regulatory authorities to bring solutions to a more complex global supply chain.
