

UL now provides CCC services for wire and cable in China

Your opportunity to expand globally through our one-stop-solution

Compulsory Product Certification (CCC) is the statutory compulsory safety certification system in China that contains important safeguards to protect the consumers' rights and interests as well as the personal and property safety.

As manufacturers in wire and cable industry strive to gain access to China and other new global markets, they need to overcome several challenges arising from global expansion in order

to stand out against competition. The challenges involve the need to strengthen their quality image, inadequate understanding of international regulatory requirements, language barrier, and difficulty in staying informed of the market change, and many others.

By collaborating with UL to handle your global market access needs, you can tap into UL's experts and facilities throughout the world, using our resources and services to reach your destination smoothly. Manufacturers can choose any combination of our services to fit specific needs or have UL deliver a turnkey solution in which we handle the entire process and deliver the desired certifications, marks and regulatory approvals.

Getting started with UL

- 1. Submit Application** – UL will review your application documents, submit them to Chinese certification body and notify you where to send your product sample.
- 2. Product Testing** – UL will follow up on the type testing.
- 3. Initial Factory Inspection** – UL will coordinate the logistics of the Initial Factory Inspection.
- 4. Certification Issuance** – UL will facilitate issuance of certificate.

Program benefits

- Reduce time and cost by integrating with other global testing and certification requirements under UL's one-stop solution service
- Seamless support from experienced engineers and technical experts locally, as well as in your target market(s)
- China Quality Certification Centre (CQC), the primary resource for obtaining the CCC Mark is a professional certification body under China Certification & Inspection Group (CCIC) – UL's joint venture partner in China
